

Verified CSR Implementation

Tree planting, field verification, and stakeholder-ready reporting

LandCheck Green Corporate gives CSR managers, sustainability teams, NGOs, and donor-backed programmes a practical way to design projects, deploy field agents, verify GPS evidence, monitor maintenance, and prepare reporting outputs from one platform.

What LC Green delivers

- Project planning with site, species, and implementation structure.
- Field-agent assignment with GPS-tagged capture and QR-linked workflow support.
- Supervisor review for planting, maintenance, and field-visit evidence.
- Premium export outputs for executive, donor, and public reporting.

Why organisations buy

- Move from activity claims to verified implementation proof.
- Keep maintenance, survival, and evidence gaps visible after planting day.
- Give CSR, ESG, and communications teams cleaner reporting inputs.
- Create credibility before procurement with dashboards, brochures, and proof pages.

Implementation flow

01

Design

Define site, approval, species mix, and reporting scope.

02

Deploy

Assign field agents and monitor planting orders centrally.

03

Verify

Review GPS evidence, images, and implementation status.

04

Report

Export board-ready summaries and stakeholder proof.

Proof pack on the website

- Corporate landing page for CSR buyers
- Interactive dashboard screenshots and product video
- One-page brochure and sample report download
- Case-study story and public transparency experience
- SEO-ready insight articles around CSR, ESG, and GPS verification
